Founding Product Manager who owns product end-to-end — roadmap, delivery, and go-to-market — at a connected-hardware startup. Took a device from concept to commercial launch and 4 enterprise pilots in its first month, lead a 10-person engineering org, and ship AI/ML features to production. Co-author of published AI research with MIT and JHU.

WORK EXPERIENCE

Kiwi Senior Health

November 2024 – Present

Founding Product Manager (product lead, full engineering + technical org)

Boston, MA

- Launched the flagship product 0→1 (web + Amazon) and **secured 4 enterprise pilots with 300+ resident senior-care facilities within its first month**; product featured by MIT AgeLab.
- Built the product roadmap from scratch, validated through **50+ user and customer interviews**, and translated findings into prioritized features, UI/UX, and accessibility fixes.
- Lead a **10-person engineering + marketing org**: own a 50+ ticket backlog across firmware, iOS, Android, backend, and web, and run all sprint planning, showcases, and refinement.
- Rebuilt the delivery process — stood up the Jira system and a dev/stage/prod pipeline with a 7-day tester gate, shipped an AI ticket-writing assistant the team now uses, and moved to async syncs, **cutting cross-team blockers 40%**.
- Shipped AI/ML to production: a fall-detection model (bidirectional LSTM, **0.971 AUC**) that cut false alarms ~50×, plus a data + validation pipeline for a model trained on 1,000+ participants.
- Own go-to-market and B2B: led the first enterprise deployment end-to-end — onboarding, KPI framework, and rollout playbook — and wrote all sales and onboarding collateral.
- Run hardware operations for both products (incl. a second device, Kiwi Band): evaluated 10+ candidate suppliers, manage overseas vendors on a 45-day production cycle, and QA every unit — **0% defects across the 100-unit run**.

Massachusetts Institute of Technology

January 2024 – May 2025

Research Project Manager · AI/LLM Privacy Study

Cambridge, MA

- Led a 10-person team benchmarking 6 commercial LLMs for third-party data exposure across **100K+ interaction data points** (Wireshark, Burp Suite).
- Co-authored published research finding 9–36% of AI chatbot requests reach third-party trackers; the work drew 200+ journal submission invitations (co-authors: Leo Celi, MIT; Joseph Sakran, JHU).
- Established a compliant data protocol, secured approvals, and delivered weekly risk readouts to senior advisors.

Prognosis · Nittany AI Challenge

December 2024 – August 2025

Founder & Product Manager

University Park, PA

- Won **3rd place and a \$7,050 grant**; pitched and secured funding to build an AI forecasting platform (5-week-ahead prediction from 21+ variables).
- Program-managed a 7-person remote team over 12 weeks; React/Flask/Docker product with VAE + LSTM models adopted across 3 regions (AWS, 99.9% uptime).

Harvard University · Digital Health AI

June 2024 – May 2025

Research Project Manager

Cambridge, MA

- Led a 10-member team improving an ML prediction system across 10 regional zones; implemented CI/CD (GitHub Actions), **cutting iteration cycles 30% and prediction error 20%**.

Lockheed Martin · Capstone

August 2024 – December 2024

Product & Software Lead

University Park, PA

- Drove a 20-week UAV instrumentation build across hardware, electronics, and software workstreams with phase gates and milestone demos; built embedded firmware and a real-time visualization tool.

VDO.AI

October 2023 – January 2024

ML Engineering Intern

New York, NY (Remote)

- Productionized ML inference for real-time ad bidding via REST APIs, Redis caching, and A/B testing on AWS Lambda.

PUBLICATION & EDUCATION

“Not a Private Consultation: Third-Party Network Traffic in Commercial LLMs” — 2025; co-authors Leo Celi (MIT), Joseph Sakran (JHU).

The Pennsylvania State University — B.S. Computer Engineering, Minor in Cybersecurity & Economics (May 2025).

SKILLS

Product: Roadmapping & strategy · 0→1 product · User research & discovery · Go-to-market · B2B pilots & onboarding · KPIs/OKRs · Hardware PM · AI/ML PM · Change management · UI/UX · Agile/Scrum · Jira · Monday.com

AI in practice: Built a team-wide AI ticket-writing assistant · AI-assisted PRDs, specs & research synthesis · Fathom meeting intelligence · LLM workflow automation

Technical fluency: BLE/IoT & firmware · iOS/Android · REST APIs · AWS · Python · SQL
